

## Fast Facts

### Pedals for passenger cars

Accelerator pedals are more than an interface between driver and vehicle. Beside the driver's perception of ergonomic they support important functionalities for reducing fuel consumption, engine management and are also integrated into safety and comfort systems.

#### Innovativeness

- Proprietary Autopad® sensor technology (inductive)
- Hanging type or floor mounted pedal design

#### Typical features

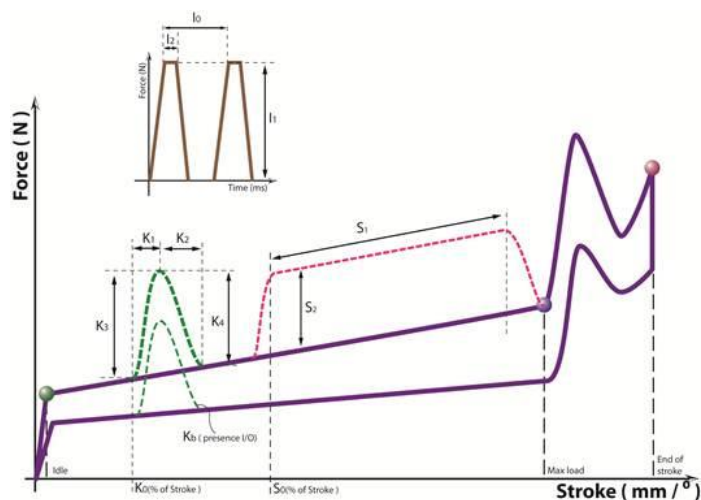

- Contactless sensor technology
- Redundant output signal
- Typically 5 V supply voltage
- Programmable output signal characteristic
- Analog or SENT output signal
- FMVSS 124
- FMVSS 302

#### Design freedom

- Kick down function on demand
- Styling pad of pedal plate on demand
- Outer shape could be customized

#### Force feedback functionality on demand

#### General Note

TT Electronics reserves the right to make changes in product specification without notice or liability. All information is subject to TT Electronics' own data and is considered accurate at time of going to print.
