

# Environmental Policy

AB-EF05-01-01

AB Connectors Limited  
Ynysboeth Trading Estate  
Abercynon  
CF45 4SF

AB Connectors Ltd will comply with all regulatory & other requirements and are committed to continual improvement of environmental performance and prevention of pollution.

The Environmental Programme addresses pollution control of chemicals, energy and water efficiency and waste reduction, all of which are subject to continuous review.

We will actively encourage our suppliers, contractors, subcontractors and all of our employees to participate in our efforts to reduce the environmental impact of our operations.

The Programme also seeks to reduce the impact of our global carbon footprint and we will achieve this by monitoring carbon emissions and reporting them on an annual basis.

In the UK we are proactively participating in the Carbon Reduction Commitment Energy Efficiency Scheme (CRC) as part of the TT Electronics group (although AB Connectors is a part of a Climate Change Agreement with the SEA), to drive energy efficiency and benchmark and monitor our progress.

In line with these principles, it is the policy of AB Connectors Ltd to:

- Establish, assess and monitor the impact of all-current or new activities, products or processes upon the environment.
- Evaluate, control and reduce noise within and outside our site.
- Reduce polluting emissions to the atmosphere to a minimum wherever possible.
- Manage and monitor the use of energy and raw materials.
- Minimise waste production, maximise re-use and recycling and dispose of waste safely.
- Ensure all contractors operate in line with the principles of our policy.
- Establish and maintain procedures to limit the effects of environmental incidents.
- Establish monitoring procedures to ensure compliance with this policy and, where measuring and testing is required, ensure that data records and results are regularly updated.
- Audit our activities periodically to ensure they are consistent with these principles and take any necessary corrective actions.
- Set Objectives and Targets as part of the Business Planning and Management Review Process

This policy relates to the Manufacture of Industrial Connectors which includes the following processes, assembly, plating, machining and other site activities of AB Connectors Ltd, conducted at Abercynon. The policy will be communicated in written form to all interested parties and to the general public.

David Hughes  
Manufacturing Director
