Statement on Per- and Polyfluoroalkyl Substances (PFAS) in Fixed and Variable Resistors

We hereby certify that all fixed and variable resistor series from TT Electronics listed in Appendix A as “PFAS free” contain no Per- or Polyfluoroalkyl Substances. Product series listed in Appendix A as “Contains PFAS” contain PFAS of the type and amount shown. All fixed resistor series have been checked and found PFAS free. Checks on variable resistor series are ongoing. PFAS has been found only in some trimmer products. This statement is based on the OECD definition of PFAS substances, the EPA PFAS Structure and Development lists, and our own product Full Material Declarations.

1. TT Electronics suppliers/partners have confirmed the material composition of these products.
2. TT Electronics has implemented processes to confirm and document compliance.
3. The information provided may be based upon actual test data, or on information from our vendors, raw material suppliers or subcontractors.
4. The checks on PFAS are ongoing and we invite enquiries about product series not yet listed.
